

## PropOne: Delivering Results and Real Value

Founded in 2011 and headquartered in Sydney, Australia, Greencorp Marine manufactures PropOne, a highly effective non-biocidal foul release coating system for underwater running gear.

"Our PropOne range has earned a reputation for superior performance and we now export to more than 30 countries worldwide," said Eli Green, owner and founder of **Greencorp Marine**. "Our customers make a good profit, and their customers get amazing results and value for their money."

### PropOne

Designed for use on propellers and all metallic underwater running gear, PropOne is a latest-generation, non-biocide foul release coating that prevents sea life from getting a grip.

"We have now been selling PropOne in the U.S. for more than 10 years," Green said. "It's a proven product that's used on thousands of boats worldwide every year."

PropOne benefits include:

- Performance: Increased speed and lower fuel consumption, compared to a craft with

fouled surfaces

- Time: Keeps working for one to two years in-water
- Slickness: Non-stick coating that marine life struggles to adhere to
- Anti-corrosion: High-performance corrosion protection for ferrous and non-ferrous metals.

PropOne offers a fully trained and licensed applicator program combined with prompt technical support.

"We get new PropOne applicators and

PropOne is a latest-generation, non-biocide foul release coating.

boatyards all the time who are brave enough to try something different," said Green. "When they see it works and we get their trust, that's what it's all about for us."

### Customers love it!

Since 2012, PropOne has built a loyal, growing following – one boat at a time.

PropOne is now applied to thousands of boats globally every year, with a proven track record of more than 10 years. Here are just a few examples of how much PropOne customers love the product:

Gold Coast Marine in Fort Lauderdale has been serving professional painters and boat yards since 1967. "Since 2013 we have been selling PropOne; it's a quality coating for running gear that works. We see the results and recommend PropOne to all our valued boat yards and contractors." – Joel Mains, owner of Gold Coast Marine.

Mullies Underwater Services prides itself in providing a high level of customer service using exceptional quality products for all its clients. "I'd recommend PropOne to anyone; it's [an] Australian-made quality product, very affordable. Results speak for themselves." – Heath Cameron, owner, Mullies Underwater Services.

Dazzling Marine is known for its quality and professional service in boat and yacht services. "I believe in PropOne. So much so that I use it on my own boat. It's Australian-made, value for money and as good as anything out there." – Darren Zuydam, owner, Dazzling Marine.

### Dealer inquiries welcome

PropOne is available through a variety of distributors across North America. The company maintains a centrally located warehouse in Columbus, Ohio, enabling fast shipping times.

"We are open to taking on new distributors and/or dealers," said Green. "As a family-owned business we care more about relationships than just profit. We are easy to deal with and team players."

### About Greencorp Marine

With thousands of applications each year worldwide, Greencorp Marine coatings provide a high level of performance for any boat, top to bottom. The company's products have a reputation for being ahead in performance and are exported to more than 30 countries worldwide.

Greencorp Marine's market-leading products include:

- PropOne, a non-biocidal foul release coating system that prevents sea life adhering to propellers and underwater running gear.
- Crystilium, a coating range that renews, protects and extends the life of marine surfaces.
- JustTeak, a complete system that will rejuvenate and protect your teak decking and furniture.

"We're proud to partner with some of the most well-known and respected marine businesses worldwide," said Green.
